

# instadose™ Dosimeter

RADIATION MONITORING DOSIMETER WITH INSTANT REPORTING

Revolutionizing the way you monitor radiation exposure in your practice.

# instadose™ Dosimeter

INSTANT, PRECISE PORTABLE RADIATION MONITORING FOR THE DIGITAL AGE

Smaller than a flash drive, the instadose dosimeter provides immediate dose readings by using any internet enabled computer.

This easy-to-use dosimeter is the only accredited USB-compatible dosimeter that enables users to measure radiation dose at any time.

There is no need to send badges to a processing center, simplifying administration and reducing costs.

## Secure Online Account Management With AMP

Instadose is directly connected to AMP (Account Management Program), a proprietary and secure online solution to manage all the elements of a radiation monitoring program anytime, from anywhere. From account administration to managing individual wearers and devices, AMP provides real time access to account details, device assignments, reports, and all pertinent account information.

### instadose™ xRay Dosimeter

- Blue (Item #: 1003520)
- Pink (Item #: 1003530)
- Green (Item #: 1006640)
- Black (Item #: 1006650)
- Silver (Item #: 1006660)

The initial purchase of the instadose dosimeter includes the cost of the first-year annual subscription to AMP. After the first year, additional yearly subscriptions can be purchased through HealthFirst (Item # 1006250).

Ask to have your yearly subscriptions be placed on Auto-Replenishment for easier ordering.

## Technical Specifications

Minimum Reportable Dose	3 mrem (0.03 mSv)
Lower Limit of Detection	1 mrem (0.01 mSv)
Useful Dose Range	3 mrem - 500 rem (0.03 mSv - 5 Sv)
Energy Response	Photon 5 keV - 6 MeV
Accreditations/Approvals/ Licenses	NVLAP (Code: 100555-0) HSE (United Kingdom) FANR-R-REG-24 (UAE)
