STAT KIT® Pedi
EMERGENCY MEDICAL KIT

Provides an extensive set of medications and devices to manage pediatric medical emergencies.
**STAT KIT® Pedi highlights**

The STAT KIT® Pedi emergency medical kit provides an extensive set of medications and devices to manage pediatric medical emergencies. The kit features a durable, hard case and is organized for quick access with separate sections and a labeled medication tray.

**Always up to date**

HealthFirst tracks expiration dates of medications and automatically replenishes them before expiration. If you are enrolled in the EMM program, HealthFirst will also replace the used medication in case of an event at no additional cost. Practices benefit by maximizing shelf-life of medications, lowering costs, saving time and gaining peace of mind.

**OnTraq**

OnTraq is an online account management tool that allows users to view each medication, expiration dates, lot numbers, national drug backorder status, and upcoming medication replenishment shipments.
